

## Clear asphalt binder

### Creating a safe, durable and aesthetic environment with asphalt

Bitucolor and Sealoflex® Color are synthetic clear binders for asphalt application.

Clear binder can be used to accentuate the natural colour of the pavement aggregates or, in combination with pigments, create asphalt surfaces with a strong and intense colour.

Coloured asphalt is an excellent choice for pavements which need that extra bit of attention or attractiveness.

### Applications

Suggested applications are as follows:

- Bicycle and footpaths
- Town squares
- Speed bumps
- Parking lots
- Bus lanes

With optimal selection of the applied materials it is possible to produce a solution in almost any thinkable colour.

### Product range

Bitucolor is the standard grade available in penetration 70/100 or other grades upon request.

Sealoflex® Color is the polymer modified grade for heavy duty and hot climate application.

### Advantages

- Easy manufacturing and application similar to normal asphalts
- Durable and similar mechanical resistance as normal asphalt
- Strong, intense and durable colours
- High ride comfort
- Texture and skid resistance is maintained
- Wide range of colour possibilities
- Variety of Landscaping possibilities
- Improved safety due to attention and separation of traffic functions
- Reduced illumination requirement in tunnels and dark areas, energy savings
- Easy to maintain and repair

### Supply and delivery

Clear binder is supplied in 200 litre steel drums, 20 ft ISO tank container or bulk in tank trucks.
